Abstract (en)
A seal (1) for a container is provided with a method of manufacturing the same. The seal has a unitary pull-tab portion (12) having a pull-tab (16) formed therein. A layer of polyester film preferably is secured to the unitary member over the pull-tab. A foil seal portion (13) preferably is secured to the pull-tab portion and constructed for securing around the opening of the container (18). The pull-tab portion preferably is formed of a first layer (22) of a plastic material fused to a second layer (24) of the plastic material by extruding the one onto the other with a release layer (26) therebetween such that an unfused portion of the first layer forms the pull-tab (16). <IMAGE>
