Abstract (en)
[origin: EP0905319A2] A solid bed rail track has the continuous lay track with brackets (4) attached to the sleepers and supporting the track on support strips (9) laid onto the prepared bed (1). Other brackets (6) are attached to the sleepers and extend under the bottom of the sleepers with the free ends secured to horizontal bars. The sides of the track are bounded by shuttering (11) attached to the track by spacer bars (10). Concrete is poured into the laid track and fills the spaces between the sleepers and between the sleepers and the shuttering.
