Abstract (en)  
[origin: EP0905667A1] Part of the marking (6) for the housing (1) is applied by deformation of the surface. Another part of the marking is carried out on a plate (4) which incorporates a bar code (7) or other markings. Part (5) of this plate is separable and can be applied to another device, particularly the vehicle accompanying documents. The characterization is effected by a laser, stamp or a plastic spray process.
