Abstract (en)
[origin: WO9743934A1] The device for holding two chopsticks in order to facilitate the picking action when eating food with sticks is configured like a rectangular planar elongate strip (1) made of a material which is elastically deformable in a plane perpendicular to its surface and parallel to its longitudinal symetry axis, said strip being provided with four orifices (2, 3, 4, 5) intended to receive the sticks (6, 7), the distance between two neighbouring orifices increasing from one end to the other of the strip (1).
