Abstract (en)

[origin: WO9747477A1] An insert member (10) for supporting an object (50) releasably attached thereto, said member being made of a heat-shrinkable plastic sheet and consisting of a main portion (11) secured to a printed article (1), and an end portion (12) extending beyond one edge (3) of the printed article, said end portion (12) being folded and adhered or sealed to itself to form a housing projecting beyond said edge for receiving the object (50) to be supported. Said object (50) is tightly held in the housing by the heat-shrunk end portion (12), and means (16, 17) are also provided for releasing the object (50) from the housing by opening said end portion (12).
