Abstract (en)

[origin: WO9743184A1] In a box (1) for containing and dispersing loose items, there are an openable cover (3) closing off the top of the interior (2), with a strip-like extension (7) which can be inserted into a slot-like aperture (8), and a flap (4) which can be pulled out from one end. The flap (4) has limiting sections (15, 16) on both sides. Both the cover (3) and the flap (4) are fitted with seals, where, after the seal has been broken, the cover (3) and/or the flap (4) can be opened and re-closed by a self-locking system.
