Abstract (en)
[origin: WO9745353A1] The invention relates to a package (1) for a continuous flexible device (2) which is wound up into a coil like a cable, a line, a rope, a hawser, a wire, a hose or similar within a protective enclosing casing (3), which is suitable for storage and transport. The flexible device (2) is wound up preshaped and received within a casing (3), which is provided with a centrally located outfeed opening (8) for said wound up flexible preshaped device (2) at the front side (9) of said casing (3). The centrally located outfeed opening is formed by an aperture (8) through the casing (3) by what means the flexible device (2) may be drawn out of the casing (3) without rotation of the spool-shaped wound up coil (27), or without use of any extra accessories. The invention also relates to a method for manufacturing said package.
