Abstract (en)

[origin: DE19740819A1] The chambers (9) have filling openings (13) for the filling of individual or all chambers (9) with detergent. The openings (9) are connected to the outlet opening (22) of a funnel-shaped detergent supply unit (9) and also form openings (13) for the washing water addition. These openings (13) can be controlled separately and correspond to the outlet openings (14). The chambers (9) have filling openings (13) for the filling of individual chambers (9) or all the chambers with detergent. The openings (9) are connected to the outlet opening (22) of a funnel-shaped detergent supply unit (9) and also form openings (13) for the washing water addition. These openings (13) can be controlled separately and correspond to the outlet openings (14) for the detergent powder enriched with water.
