Abstract (en)

The present invention relates to compositions comprising a peroxygen bleach, a chelating agent having a mobility factor greater or equal to 0.7 and a cheating agent having a mobility lower than 0.6, characterised in that the weight ratio of the cheating agent having a mobility factor greater or equal to 0.7 to the chelating agent having a mobility factor lower than 0.6 is of more than 1:1. These compositions are particularly suitable for the cleaning of carpets, resulting in effective overall stains removal performance for example on particulate stains and/or greasy/oily and/or bleachable stains and/or enzymatic stains while proving improved colour fidelity.
