Abstract (en)

[origin: EP0906986A2] Aliphatic glycol ether derivatives are used as diffusion accelerators in the dyeing of polyester fiber materials with dispersion dyes in a high temperature dyeing procedure. Process for dyeing polyester-containing fiber materials in a dye liquor containing at least one dispersion dye and at least one diffusion accelerator selected from aliphatic glycol ether derivatives, using a high temperature dyeing technique. An Independent claim is included covering the use of named aliphatic glycol ether derivatives as diffusion accelerators in the dyeing of polyester-containing fiber materials with dispersion dyes in a high temperature dyeing procedure.
