Abstract (en)

A device for reading and validating documents in general which are provided with magnetic bar codes and the like, comprising a casing (2) which can be moved manually over a document to be validated and supports, in a lower part thereof, a magnetic reading head (10) flanked by a permanent magnet (12). The magnetic reading head (10) is operatively connected to a data processing unit (15) which is connected to a display accommodated in the casing (2). <IMAGE>
