Abstract (en)

[origin: DE19620566A1] The invention relates to a storage device (1) for screwdriver bits (13) or the like and a chuck (20) therefor in a compartment, in which the screwdriver bits (13) with their clamping shafts inserted in pockets and the chuck (20) having a head (21) with an insertion aperture can be removed after the storage device has been opened. To provide a construction which is easy to use and promotes sales, the invention proposes that, with the storage device (1) closed, the operative ends (14) of the screwdriver bits (13) and the head (21) of the chuck (20) be exposed to the outside.
