Abstract (en)

[origin: WO9743310A1] An inhibitor of the HCV NS3 protease. The inhibitor is a subsequence of a substrate of the NS3 protease or a subsequence of the NS4A cofactor. Another inhibitor of the present invention contains a subsequence of a substrate linked to a subsequences of the NS4A cofactor. In another embodiment the inhibitor is a bivalent inhibitor comprised of a subsequence, a mutated subsequence or a mutated full-length of a substrate of the NS3 protease linked to a subsequence, a mutated subsequence or a mutated full-length subsequence of the HCV NS4A cofactor.
