Abstract (en)

[origin: WO9749974A1] The present invention refers to a liquid dispenser comprising a valve block (1) that can be attached onto a vessel or which can be connected to a reservoir, said valve block including an intake valve (2), a supplying and dosing cylinder (3) in which a supplying and dosing plunger (4), connectable to an operating means (5), is slidably accommodated, and comprising an outlet means (6) for the liquid connectable to the valve block (1). According to the invention, the valve block (1) and the supplying or dosing cylinder (3) form an integral unit.
