Abstract (en)

[origin: EP0908111A2] A machine for folding and gluing edges of materials in sheet form, particularly leather parts of shoe uppers, comprising a working surface and mechanical elements such as a foot (6) for folding the edge of the part being treated, a guide (8) for the abutment of the part to be treated, a folding element (13) and a cutting blade (15), a main motor for the actuation of the machine and a microcomputer for storing parameters related to the operation of the machine being further provided, the particularity of the machine being that it is equipped with independent actuations for the blade (15) which are synchronized with the main motor of the machine. <IMAGE>
