Abstract (en)
[origin: EP0908392A1] The sachet (10), preferably of a plastics film material, has a closure made from a tab (20) of a material with a self-adhesive surface. The flap (18) of the sachet which is folded over to close it has a hole (19) in it through which the adhesive tab is applied to the front surface (14) of the sachet. The sachet can be made from a multilayer material such as plastics and paper or plastics and metal foil. The hole in the closure flap measures between 0.6 and 6 mm across, and preferably 0.8 - 3 mm, and can be circular or polygonal in shape.
