Abstract (en)

[origin: EP0908580A1] The device for placing slabs (21) in horizontal rows (20) on a facade (19) includes two vertical arms (3) separated from each other. A horizontal beam (4) is carried by the upper part of the arms and has a projecting longitudinal part (7) and retaining means (14) connected to the arms between the beam and their lower end. There is also a projecting holding part (16) having an anchoring peg (18) at its end.
