Abstract (en)

[origin: DE19744141C1] The handle has a plate fixed to the door leaf and a handle mounted on the plate to actuate a lock. The bolt for taking the different locking positions is parallel to the rotary axis of the handle. The bolt (26) can rotate to at least one locking position with a defined rotational movement, engaging with a stop (44) mounted with respect to the lock plate.
