Abstract (en)

[origin: WO9849063A2] In a package of batteries of the zinc air type the batteries are received in respective pockets formed in a container base and have their air holes covered by respective covering portions of a unitary element of flexible sheet material, the element including a spine portion attached by adhesive to the base. The batteries are loaded simultaneously into the pockets by an automated filling machine and the flexible sheet element is subsequently applied by an automated labelling machine.
