Abstract (en)
[origin: WO9800889A1] A plug connector is designed with a metallic screening cage (7) made of a single sheet metal piece with a fore plate (8), a cover wall (9) and side walls (14 to 17) angled at 90 DEG which extend up to a printed circuit board (18), so that the insulating body (1, 2) of the plug connector and its contacts (4) be completely contained in the screening cage (7) and retained between the printed circuit board (18) and the screening cage (7) in a position in which they are screened on all sides.
