Abstract (en)

A method for forming and decorating unfired ceramic tiles ahead of a press (2) and the machine for carrying out the method provide for a plurality of strokes to be performed with a loading carriage (3), which is provided with at least two rows of compartments (3a, 3b) which are arranged sequentially and are adapted to be aligned, at each stroke, respectively with a loading station (7) and with a decoration station (8), in which there is provided a bed (10) which lowers at each return stroke of the carriage (3), and with the decoration station (8) and the mold (4) of the press (2).
