Abstract (en)

[origin: EP0909734A1] The dispenser (10), comprising a housing with a supporting rod (30) for a roll of material which is dispensed by pulling on its end, has the rod inclined at an angle to the horizontal so that one side of the roll is pressed against one of the housing's vertical walls (14,18) to provide a brake on the rotation of the roll. The dispenser wall against which the roll is pressed has a friction zone with projecting radial ribs (46).
