Abstract (en)  
[origin: EP0909898A2] The device has a number of modules (10-13), e.g. pressure regulators or filters, contained within respective module housings (15-18). The first module acts as a monitoring module for each of the other modules, with a bus line (42) of a bus system connecting the modules together. The monitoring module provides a control function via a central unit of the bus system, each other module provided with a bus subscriber station (39) coupled to sensors and/or actuators (20).
