Abstract (en)

It is constituted by a body (1) in the form of dish, the skirt (2) of which is provided with means for coupling to the mouth of the container, said cover including on its base (3) or bottom, a wide transversal diametral groove (4), of scarce depth which on one of its ends is finished off with a window (5) for the output of the product towards the outside, said window (5) being assisted by a shutter (8) in the manner of sliding piece which slides in the interior of said groove (4). <IMAGE>
