Abstract (en)
Irrigation hose winding cart constituted by a minimum number of component parts that are preferably made of moulded plastic material and adapted to be snap-fitted together. A single U-shaped support member (12) ensures the connection of the handlebar member (10) with the base member (11) and supports both the spool (13) and the wheels (16) of the cart. The construction and the assembly of the cart are in this way made simpler, more convenient and cost-effective. <IMAGE>
