Abstract (en)  
[origin: EP0911844A2] The electrical push button switch has a movable contact (8) carrier in the form of an elastic material (1) that has a diaphragm section (5) and a stud (4). The contact is formed on the end of the stud which is guided in the sleeve section of a flanged insert (14). The stud has a sleeve of plastic (18) with good bearing properties. Fixed contacts (7) are formed on a circuit board (2).
