Abstract (en)

[origin: WO9802077A1] The present invention provides a shower apparatus (10), suitably in the form of a shower column, comprising a plurality of shower heads (11, 12, 13, 14) each attached to respective conduit means (21, 22, 23, 24) which are in communication with a mixing means (17) which in turn is in communication with a hot and cold water supply, said shower apparatus (10) comprising diverter means (15) which are located between the mixing means (17) and the conduit means (21, 22, 23, 24) for diverting water originating from the mixing means (17) either to one shower head at a time, or alternatively, to more than one shower head at the same time.
