Abstract (en)

[origin: FR2755675A1] The invention concerns a device for storing and transporting elongate elements folded down on the same side, such as motor vehicle bumpers (4). The invention is characterised in that it comprises vertically along two opposite sides (11) several series of generally U-shaped semirigid straps (2), the transverse branch (20) of which extends substantially horizontally inwards, two mutually opposite straps (2) being adapted for supporting, with their transverse branch (20), an element (4) at the zone connecting (42) its intermediate part (40) to its ends (41).
