Abstract (en)  
[origin: WO9800503A1] Detergent composition comprising a bleaching agent and a dianionic or alkoxyated dianionic cleaning agent having a structural skeleton of at least five carbon atoms to which two anionic substituent groups spaced at least three atoms apart are attached, wherein one anionic substituent group is a sulfate group or an alkoxy-linked sulfate group and the other anionic substituent is selected from sulfate and sulfonate, optionally alkoxy-linked.
