Abstract (en)

[origin: WO9803724A1] A method for printing a textile label (1, 21), provided with at least a top layer (6, 26), which top layer (6, 26) comprises at least a synthetic material, and ink-sorbing means (13, 23, 30), comprises the following steps: providing a printing by means of ink (15) of the subliming or transfer type, which ink (15) is directly provided on the textile label (1, 21) and absorbed or at least retained by the ink-sorbing means (13, 23, 30); heating the textile label (1, 21) so that the ink (15) is at least substantially transferred from or out of the ink-sorbing means (13, 23, 30) to the synthetic material (14, 24); and cooling the textile label (1, 21) so that the ink (15) is fixedly connected to the synthetic material (14, 24).
