Abstract (en)
[origin: WO9804880A1] The invention concerns an installation for securing a firearm against unauthorized removal and/or firing, as well as for securing and/or storing objects against unauthorized removal, comprising a locking device (9, 10; 14) and an identification device (11, 16). The identification device (11, 16) is designed for wireless exchange at least of unmistakable identification codes (30, 36), and consists of at least one sending and/or receiving unit (18, 19, 20) allocated to an authorized user and another one allocated to the identification device (11, 16). At a distance or over a range of distances between the sending and/or receiving units (18, 19, 20) of 0 to 1,000 mm, but preferably 0 to 50 mm, and matching identification codes (30, 36) of the user's sending and/or receiving unit (19) and the identification device's (11, 16) sending and/or receiving unit (18, 20), the locking device (9, 10; 14) is de-activated by the identification device (11, 16).
