Abstract (en)

[origin: WO9746878A1] The invention concerns a device for measuring the properties of an endogenous fluid, in particular for measuring the pH of vaginal fluid, in a manual medical examination. The device comprises an elastic protective clothing article which can be slipped on and used for the examination, a test strip (2) comprising a coating with an indicator agent (2.2) for measuring the pH of the vaginal fluid during the examination, and a double-sided adhesive tape (2.3) for securing the test strip to a section (1.1) of the protective clothing article.
