Abstract (en)
[origin: EP0913170A2] The protective jacket is made of a top fabric (16) connected to a lining (17). The top fabric (16) consists of at least one carrier layer, and the lining of at least two layers. The carrier layer and the lining layers are made of flame retardant material. A ventilation membrane is applied on the carrier layer surface facing the inner lining (17), preferably by lamination.
