Abstract (en)
[origin: EP0913353A1] The cage (2) has a fixed point (9) to which the end of the cable opposite to the counterweight is attached. The cage and counterweight run in guides such that the guide for the cage is located on one side of the cage in the frame (5) of the lift shaft. The guide preferably comprises two guide rails (11). these rails are formed by T-sections (13) along which the cage is guided on one side.
