Abstract (en)
[origin: WO9801147A1] The invention is related to a solution formulation of Cyclosporin A in 1,1,1,2,3,3,3-heptafluoropropane which is suitable for administration to a patient by inhalation using any standard medicinal aerosol device. Standard excipients normally used in medicinal aerosol formulations to aid valve lubrication or improve flavour may also be added. Other medicaments in solution or suspension may be used in addition to Cyclosporin A and other propellants in addition to 1,1,1,2,3,3,3-heptafluoropropane may be used.
