Abstract (en)

[origin: WO9804873A1] The invention relates to a water heater apparatus (11) made of plastic material, in particular a pressurised water heater tank, comprising a boiler body (12) made of a thermoplastic polymer material, an insulation (13) arranged externally to said boiler body (12) made of a material which is compatible or made compatible to the material of the boiler body (12), and a shell (14) which is external of the insulation (13), preferably also made of a material which is compatible or made compatible to the material of the boiler body (12).
