Abstract (en)  
[origin: WO9848448A1] The invention concerns the attachment of coiled filaments to supply leads in electric lamps. One end (41) of the supply lead is flattened and U-shaped. The U-shaped section (41) of the supply lead forms a slot-shaped receptacle (45) for a helical coiled filament end (3a), the slot -width of which is narrower than the outside diameter of the coiled filament end (3a).
