Abstract (en)
[origin: EP0914796A2] The decalcification device has a container (11) with decalcification fluid in it with at least one container with a cleaning point (12) through which the fluid can be passed simultaneously with abrasive materials. The abrasive material may coat or go through the material. The container may be disposable or may be seen with a removable bottom (14). The container may be made from flexible materials like plastics. The container with the fluid in it may be connected to the cleaning point and may be exchanged using a collet (17).
