Abstract (en)

A reel handling machine is provided, in particular for paper material production lines, comprising: a base structure (2), at least one pair of movable arms (3) connected to the base structure (2), a driving apparatus (7) adapted to move the arms (3) between a loading or unloading position and a work position, and grasping means (8) for the reels supported by the arms (3), each of said arms (3) comprising at least two portions (9, 10) which are movable and consecutive with respect to each other, and connections (10a, 11) between the portions (9, 10) adapted to enable each of the arms (3) to take positions included between a contracted setting and an extended setting defining the minimum and maximum lengths of the arm (3) respectively, the driving apparatus (7) selecting the arm length adapted to the sizes of each reel. <IMAGE>
