Abstract (en)
[origin: EP0915197A2] The lead and the tube(s) are fixed on the rear wall of the machine during transport by means of a holding component in the form of a U-shaped bend (4). The bend (4) can be coupled form-lockingly with the free tube end and features two clip-like holding openings (6) on its two sides (5). The openings (6) are adapted to the tube diameter and the bend (4) can be fastened detachably to the rear wall of the machine.
