Abstract (en)

[origin: EP0915198A2] The device features a support plate (1) which incorporates a holding flap (3). The flap (3) is joined to the plate (1) in one piece and projects vertically in relation to the plate plane. It features an opening (2) which accommodates the heating rods (9). The rods (9) are held through contact with at least one of the opening edges or with beads formed on the support plate (1).
