Abstract (en)
An economising device for toilet cistern integrates a waste valve (18) obtained from plastic material or other suitable materials, comprising a primary lever-system (10), connected on the one side to a push-button (12) and on the other side to said valve (18), and a second lever-system (14) activated by a second push-button (16) for its interaction with said primary lever-system (10). <IMAGE>
