Abstract (en)
A last with a device for fixing the insole to a shoe, having a plate-like template (2) for locating and guiding nails (3), arranged to cover at least part of the lower surface (4) of the heel portion (5). The last (1) comprises an internal seat (6) for accommodating, at the lower face of the heel portion (5), a nail supporting head (7) which can be slidingly received in the internal seat (6), and drive means arranged to move the nail supporting head (7) between a working position, in which the nails (3) carried by the head (7) protrude from the template (2), and a rest position, in which the nails (3) are completely retracted into the internal seat (6). <IMAGE>
