Abstract (en)

[origin: EP0916282A1] The container (21) is open at one end and has an applicator (22) for the product, attached to a holder (20). The neck of the container has a wiper (16) of a foam material to remove surplus product from it as it is withdrawn from the container for use. The applicator, which is made partially from an injected plastic material, e.g. an elastomer, has its tip (25) offset at an angle to its holder (22) and stem (23) and shaped for more convenient application of the product.
