Abstract (en)

[origin: EP0916286A2] The mounting has a holder (3) to secure it to the side metal frame (2) of the drawer. The holder has a carrier plate (4) and a pressure plate (5) to take the drawer frame between them. A clamping bolt (6) passes through an open slit (12). The holder is at a support stop (19) on one side, with the height adjusted by an eccentric (18), and a ratchet stop (15) at the other side. The ratchet stop has a locking stop (14) across the drawer frame, to grip back with an angled laying surface (17). The adjustment eccentric grips into the slit along the drawer line, which is expanded to form a locking stop (14).
