Abstract (en)
[origin: EP0916534A2] The unfinished vehicle door has a door box connected to a window frame (1) consisting of a strip (2). Molded parts (3, 4), which widen either side of the cross section of the window frame towards the door box and are fitted against the upper region of the strip nearest the roof are connected to the strip. These parts are also connected to the door box itself or to the A and B columns of the door box.
