Abstract (en)

[origin: EP0916580A2] The device has several driven endless feed elements closed up to each other. There are covering and wiping elements (25) on at least one of the adjacent feed elements (5-8), at least partly overlapping the other one transversely to the moving direction (27). The feed elements may be spaced from each other at a spacing which is smaller than their length in the movement direction of the feed elements.
