Abstract (en)
The invention relates to a plug (1) specifically designed for citrus juice or citrus based product juice vessels comprising a plug covering portion (5) for closing the plug (1) at the top thereof, said portion (5) being connected to the plug by a tearable element (4) projecting from the plug contour. The plug (1) is rigid with a cylindric body (3), arranged inside the volume defined by the plug, so as to define a first annular gap (6) in which the neck of the vessel is engaged by a plug-in type of engagement. A second annular gap (10) cooperating with a circular ridge (12) is arranged inside the first annular gap (6), said second annular gap (10) being designed for receiving an essential oil or like aromatic substance holding dispenser (8), which forms a single body with the plug (1) and is provided with a channel coaxial (9) with the juice exiting hole (15). <IMAGE>
