Abstract (en)
A sun-blind (1), in particular of the type which is to be mounted on an outside wall of a building (13), having an elongated frame or housing (2) and shading means (3-6) comprising a movable screen (3). The screen (3) can extend over a specified distance with respect to the frame or housing (2) and, in its mounted state, may include an angle (α) with the outside wall (13) to which the frame or housing (2) is mounted. The frame or housing (2) is provided with lighting means (7) disposed for lighting the space under the frame or housing (2) and the screen (3), irrespective of the position of the screen (3). Electric power supply means (11) in the form of a battery may be accommodated in the frame or housing (2) for the purpose of supplying the lighting means (7) with electric energy. Preferably, the frame or housing (2) comprises solar cell means (8), which are operatively connected to the power supply means (11). The sun-blind (1) may be a compact, integral, single unit, which can be mounted in one operation. <IMAGE>
