Abstract (en)
[origin: EP0916797A2] A decoration trim element (75), to form the visible side of the window or door, is at the inner side of the window/door (10) to cover the pane frame (12) and the screen frame (11). It is in two parts (72,87), where one part (72) is at the pane frame (12) and the other part (87) is at the screen frame (11), gripping round them so that, when the window or door (10) is closed there is an even visible side. The decoration element can be a solid bar of wood or plastics, or a profile of plastics or metal.
